Type of Drug Measurement

When do I use the **XX, Not Reported** Type of Drug Measurement?

If a substance is sent to a laboratory for analysis and a response has not yet been received, enter XX, Not Reported for the Type of Drug Measurement.

U, Unknown should be entered for the Suspected Drug Type with a XX, Not Reported Type of Drug Measurement.

1, None should be entered for the Estimated Drug Quantity with a XX, Not Reported Type of Drug Measurement.

Once the Drug has been determined by the laboratory, the Known values should be entered for Suspected Drug Type, Estimated Drug Quantity & Type of Drug Measurement. This new information must be resubmitted to update previously submitted Incidents.

For example: A bag of white powder, suspected to be drugs, was seized. The powder was sent to the laboratory for analysis. U, Unknown is recorded for the Suspected Drug Type, 1, None for Estimated Drug Quantity & XX, Not Reported for the Type of Drug Measurement pending laboratory results.
