

MTIBRS "Tip" of the Month

How do I report the new, synthetic drug Spice?

Spice (which is also known as K2) is a synthetic cannabinoid.

Agencies should **not** classify Spice as marijuana for crime reporting purposes. Because it has been known to cause hallucinations in some users, the FBI Laboratory's Chemical Unit has advised agencies using an Incident-Based Reporting System (i.e. MTIBRS) should report the drug as **K = Other Hallucinogens**.
