

MTIBRS

"Tip" of the Month

MTIBRS

We are happy to announce that our new crime data reporting system, MTIBRS, is now Live!

This system is a secure web-based repository for crime data submissions. It is only available to law enforcement personnel that have been given access by the Montana Board of Crime Control (MBCC). Users can import their data files directly into MTIBRS & have immediate access to their Import Results report. View instructional webinars on how to create a [New User account](#) & [import a crime data file](#).

MTIBRS, also, has a secure web data entry feature. Only law enforcement personnel that have been given access by MBCC can enter their incidents directly into MTIBRS.

MTIBRS Online Reporting (MOR) is our new interactive crime reporting website that allows users to select reports based on offense, offender/arrestee, victim, and property data elements from MTIBRS. Users can also create their own custom reports based on many variables and export the reports in multiple formats. View a brief introduction webinar on how to use [MOR](#).
