"Tip" of the Month

**IF I ARREST SOMEONE FOR HUFFING A CAN OF DUST REMOVER
(OR ANY OTHER CANNED INHALANT), WHAT DRUG TYPE DO I CHOOSE?**

HOW SHOULD I REPORT THE DRUG QUANTITY & MEASUREMENT FOR AN INHALANT?

Inhalants are classified as a Hydrocarbon.

Drug Type would be P = Other Drugs.

Drug Measurement would be OZ, ounces.

Drug Quantity would be the number of ounces printed on the can.

For example, you seize a 10 ounce can of Dust Remover during the arrest:

P = Other Drugs

10 = Drug Quantity

OZ = Drug Measurement
