### **Offender Information**

The following needs to be collected for an Offender (suspect) per incident:

Offender Sequence Number (how many)  
Age (or at least an Age Range)  
Sex  
Race  
Ethnicity

Click [here](#) for details on these data elements.

### Offender Information

Any known information of an offender needs to be entered per incident. If information is known for only some of the data elements, it still needs to be entered.

For example, you may know that there is only 1 offender but the Age, Sex, Race & Ethnicity is unknown. Or you may only know that the 2 offenders were Female & the Age, Race, & Ethnicity is unknown.

If nothing is known about the Offender (even how many), then an Unknown Offender should be entered according to your RMS. For example: the Offender Sequence Number (how many) should be 0 and the Age, Sex, Race, & Ethnicity should be entered as Unknown.
